

## Technical Bulletin No 21

### Dissolved Air Flotation Systems.

Sewaco design supply & install a range of horizontal flow DAF units with flows between 1.0 to 25m<sup>3</sup>/hr in manufactured either 316 or 304 stainless steel. Our DAF plants are supplied with bespoke GMS access walkway systems to facilitate maintenance & routine inspections, along with easy access hatches. The design concept is to ensure that plant operators & maintenance engineers can undertake their tasks with ease.

White water is produced using a venture and gap meter to reduce operating cost.

Micro fine bubbles from saturation vessel 'White water' rising in contact zone.

DAF unit fitted with access hatches to enable inspection and odour control to remove malodours.
